

Capstone Project

Business Framing Document

CRISP-DM Methodology

Highlights of CRISP-DM

Feature of this methodology

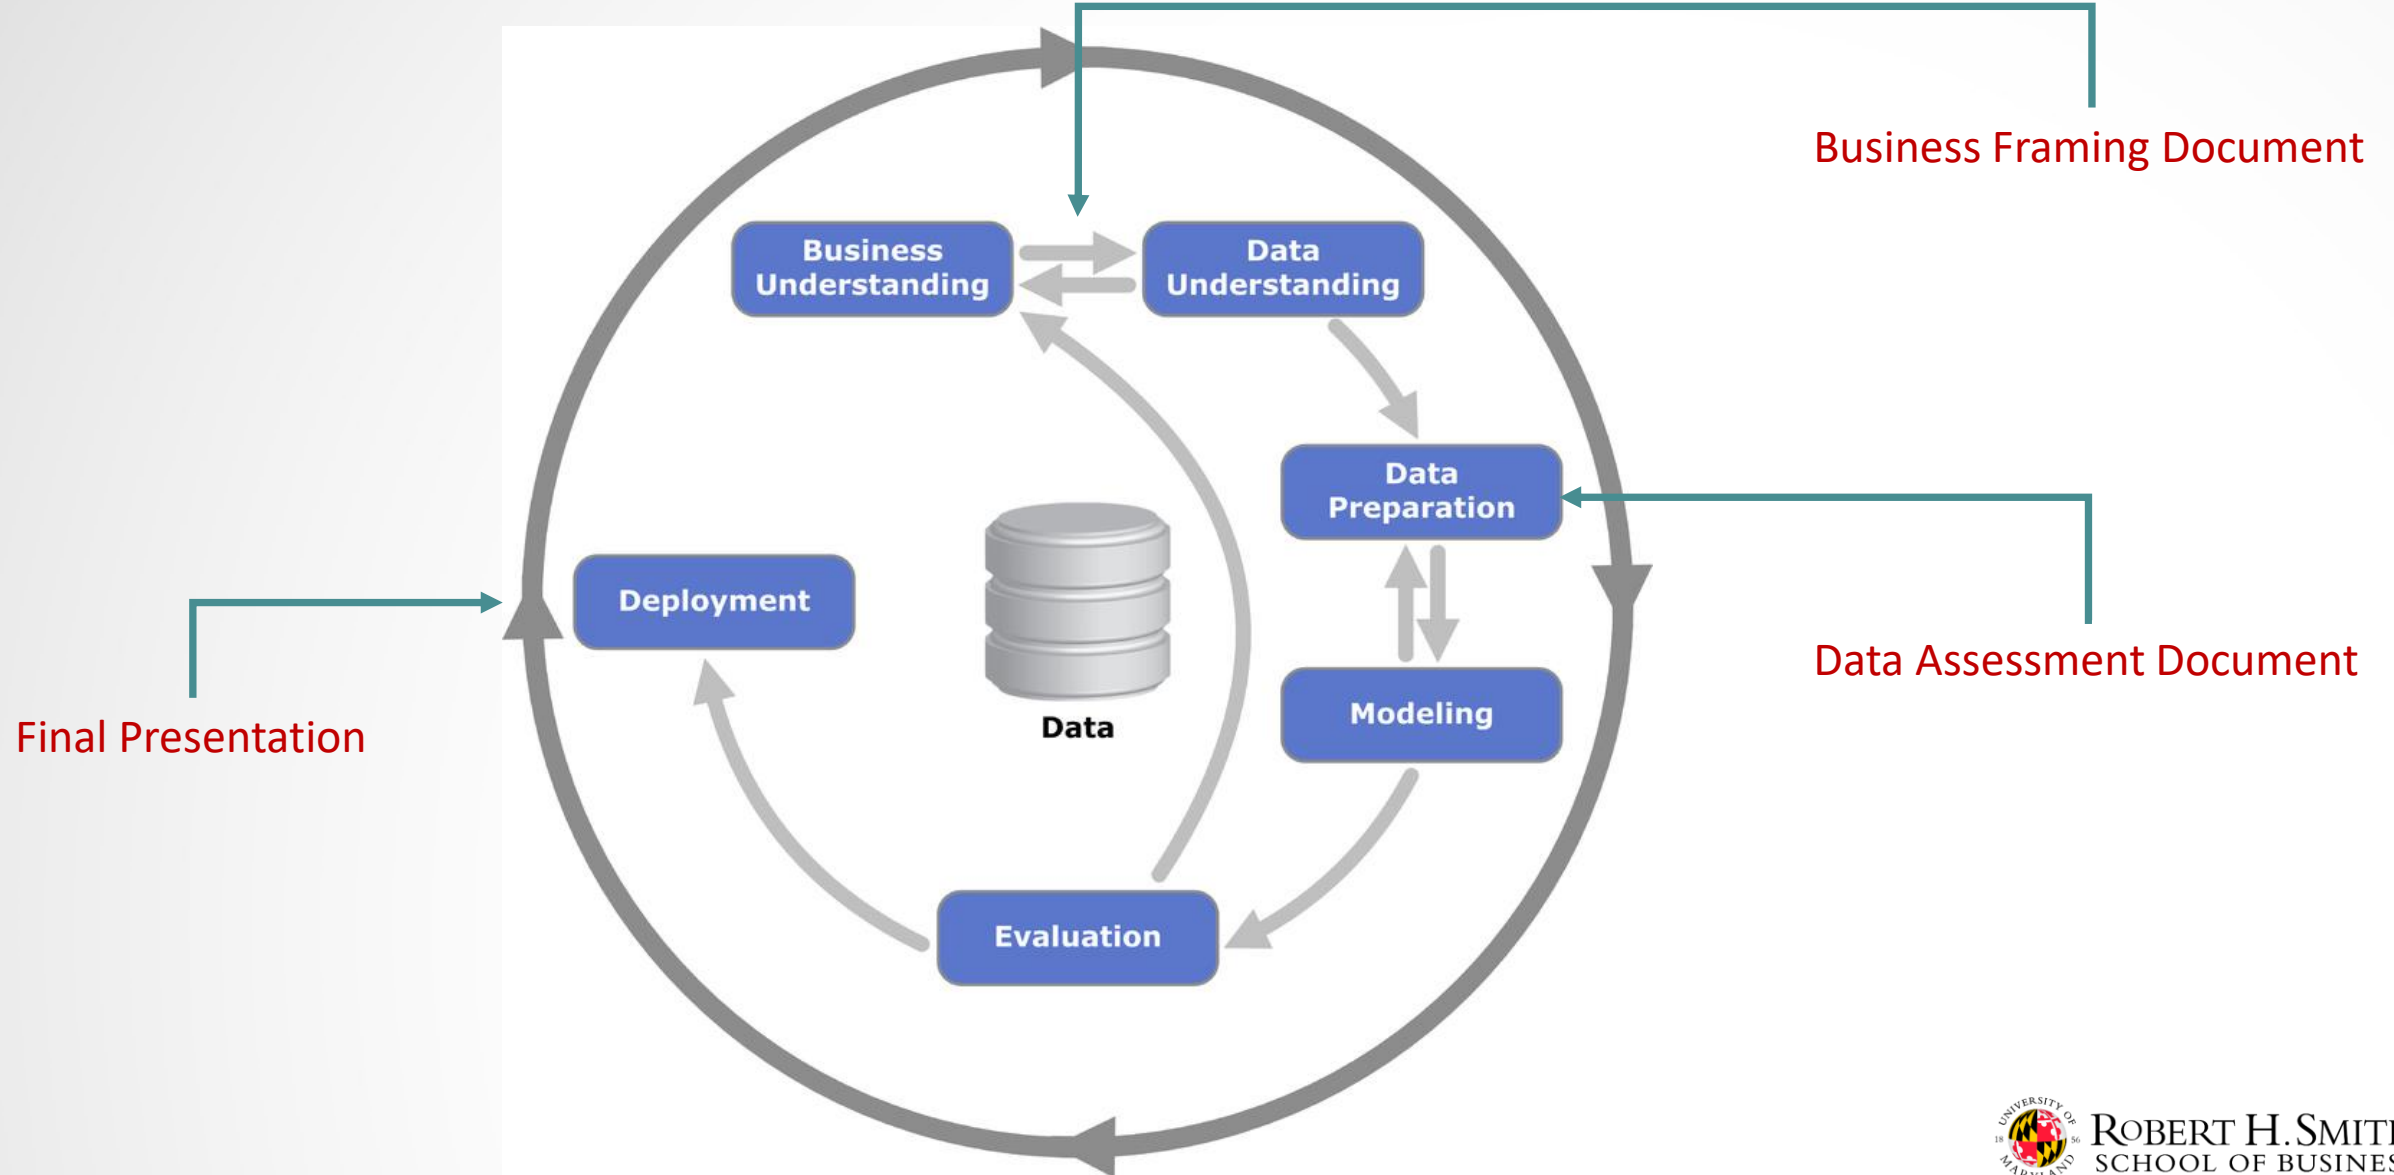

- Starting point: Business Understanding
- Business Understanding and Data Understanding are highly iterative
- NOT a linear process
- Supports continuous improvement
- DATA: “Center of the Universe”
- Validation from the business is critical to success

Figure from “IBM SPSS Modeler CRISP-DM Guide”, IBM Corp, 2012 (this is the reference we are using for the course, available in CANVAS).

- Most analytics professionals have a “methodology” in mind when beginning to work on a project
- Many have used the CRISP-DM (which stands for **C**Ross **I**ndustry **S**tandard **P**rocess for **D**ata **M**ining)
- CAP is a very close methodology established by INFORMS

CRISP-DM Methodology

Business Understanding - Example

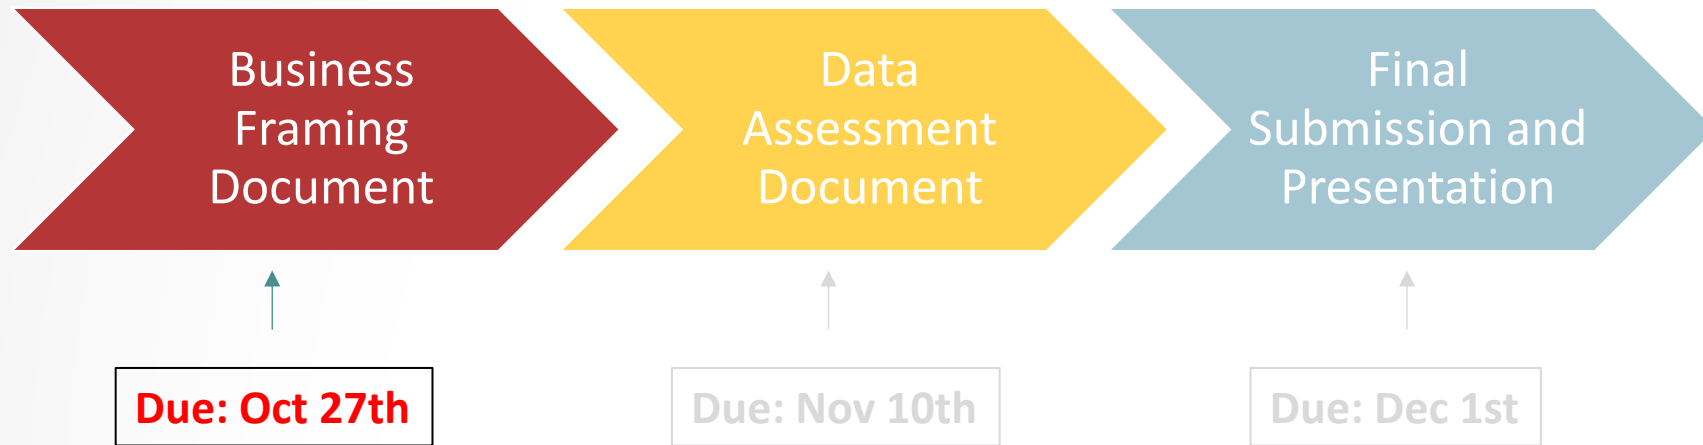

- ORIGINAL PROBLEM: Markdown Optimization for “rack”

- FINAL PROBLEM: Assortment Optimization for NORDSTROM

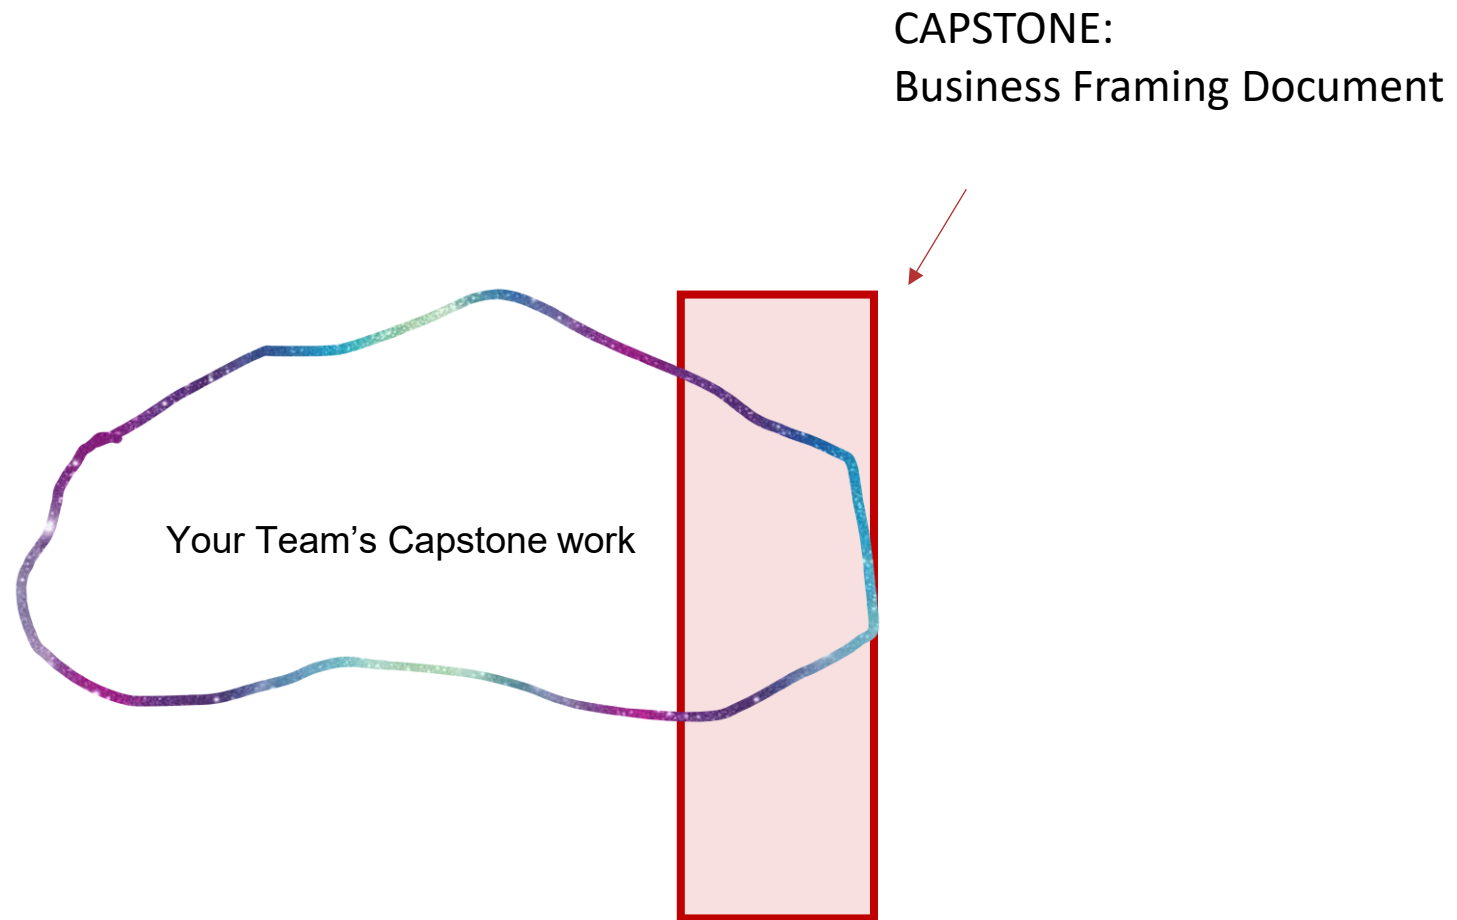

Capstone Deliverables

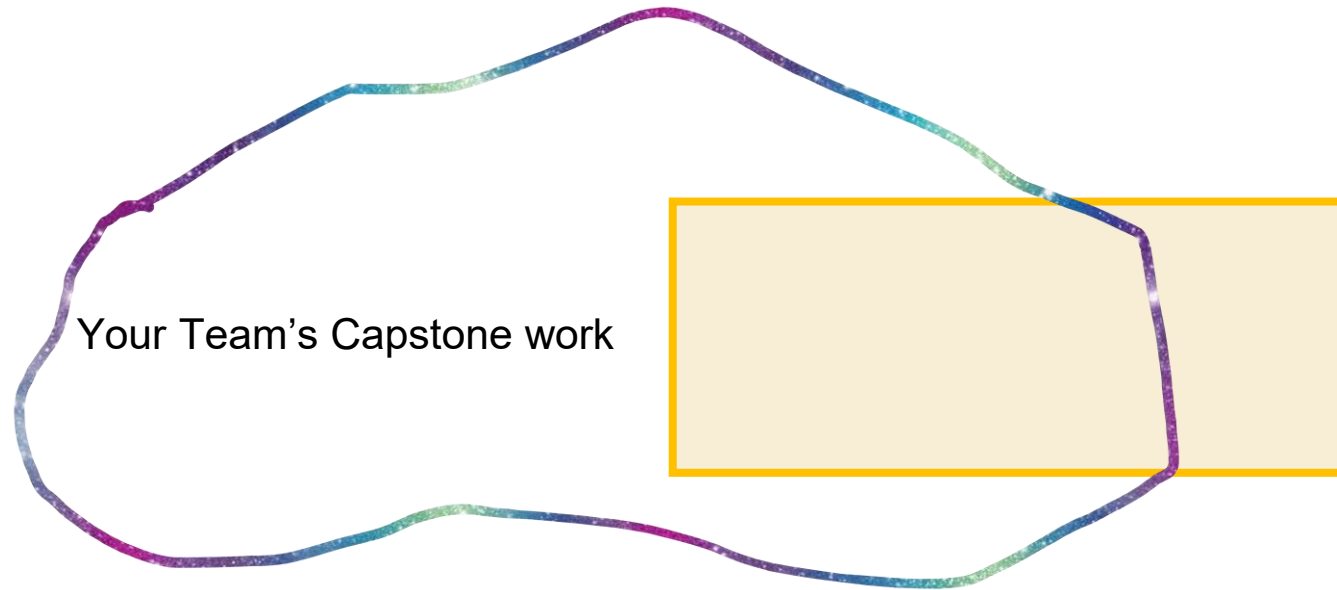

Business Framing Document (Project Proposal)

- Create a Powerpoint deck that outlines:
 1. The description of the business problem and high level **objectives**
 2. Business **background** (stakeholders, history of problem, resources available)
 3. Business **success criteria** (what does it mean to succeed? How will it be measured?)
 4. Data requirements, assumptions, and limitations
 5. **Risks** and **contingencies** (What could go wrong? What is your plan to be prepared for that?)
 6. **Stretch goals**, if any
 7. **Plan** (How will you use the time you have to implement the key steps? Typically, following CRISP-DM steps and using a Gantt chart format)
- A previous submission has been posted (not to be taken as a sample – do NOT mimic!)

Capstone Progression - BFD

Capstone Progression - DAD

CAPSTONE:
Data Assessment Document

Meeting with the Project Mentor

- Professor will set up an initial meeting (MANDATORY)
 - **Monday, October 21st**
 - 15 min slot per team
 - Virtual Meeting (use class Zoom link)
 - Sign-up sheet: [Sign-up sheet \(Faculty Meeting\)](#)
- Topics
 - Project description and goals
 - Current efforts
 - Questions/challenges, if any
- Role of TA
 - Data related
 - Meeting Scheduling
 - Access
 - Miscellaneous

You never get a second chance
to make a first impression.
